

## **Bioethanol song**

The school is the best place to find a project  
Jezsu's where we found it too  
Miskolc where it started, Vienna came in row  
Thinking much, looking for Krakkow  
Come over and start up a prayer session with just me  
And trust me I'll give it a bless now  
Listen here now, let's get to the topic  
And then they start to rhyme, now they're singing like

A way to move your car forward  
Bioethanol's a great opportunity  
Come on now, get on with it  
This fuel is greener than any  
It's made out of wasted starch  
Lower emissions, no more toxicity  
Come on now, think about it  
Come, come on now, think about it

I'm in love with green energy  
We can see many benefits,  
It's the cleanest from all of energies  
We can reduce carbon footprint,  
It's our last chance let's do it,  
To save our (planet) Earth.  
Every day discussing something brand new,  
We will tell you about it.  
(Oh-I...)  
It will take one potato,  
(Oh-I...)  
To produce bio-ethanol

(Oh-I...)

And pollution will be reduced.

Instead of using fossil fuels

Put biomass waste in use

We are learning something brand new

I'm in love with the molecule

One week we let experiments begin

Producing ethanol

crucial glucose, go all you can get

Fill up your tube and centrifuge

We wait for hours and hours 'cause it took so long

But finally it was okay

listen to presentation

measure in photometer – and singing hurray

Chemistry, you know I want your love

starch, paper and wood we splitted you up

Glucose now, eaten by yeast

It is crazy, ethanol's here

Say, boy, let's not touch the glass

take a sheet and make a graph out of me

Come on now, presentate

Come, come on now, presentate

We have learnt a thing or two

About ecology and biofuel

We've experienced lab work too

Thanks to the erasmus plus

With great students communities

We've seen beautiful cities

We've made memories that stay for years

Polish Hungarian Austrian friends

(Oh-I...)

We're in love with erasmus plus

(Oh-I...)

We're in love with erasmus plus

(Oh-I...)

Thank you for erasmus plus

Biotechnological project is the best

Remind it to your friends
